

# THE VULCAN

CPNI APPROVED

01522 532038

APPROVED FOR UK GOVERNMENT USE

The Vulcan offers a maximum level of security particularly in areas of sensitivity and importance to the national interest.

The Vulcan security door is a strong candidate to secure any entry and exit point for a range of critical sites. Perfect for use in Utilities, Telecommunication, Pharmaceutical sites, Chemical Plants, Military Installations, Transport hubs and Government buildings.

of National Infrastructure

# SPECIFICATION

## THE VULCAN

01522 532038

Product	Type	Minimum Structural Opening Height (m)	Maximum Structural Opening Height (m)	Minimum Structural Opening Width (m)	Maximum Structural Opening Width (m)	Security Rating
Vulcan	Single leaf outward opening doorset	1.4	2.50	0.8	1.30	On request

Suitable for all high security requirements in areas that require the highest degree of resistance to physical attack, the Vulcan uses a very high security locking system capable of incorporating purely mechanical deadlocking functions or integrated electro-mechanical/solenoid deadlocking capability for use with access control systems.

The Vulcan door range offers a great deal of flexibility and customisation in respect of dimensions and locking arrangements including panic and emergency escape facility available for fast single action escape to comply with either BSEN1125 or BSEN179.
